DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13, 15-20, 22-26 renumbered as 1-24 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or make obvious evaluating and outputting a final clustering solution for a plurality of multi-dimensional data records having multiple heterogeneous feature spaces represented by feature vectors including defining a distortion between two feature vectors as a weighted sum of distortion measures on components of said feature vectors, clustering said multi-dimensional data records into k-clusters using a convex programming formulation and:

- selecting feature weights of said feature vectors and minimizing distortion of k-clusters as recited in claim 1;
- selecting optimal feature weights by an objective function to produce a final solution of final clustering that simultaneously minimizes average intra-cluster dispersion and maximizes average inter-dispersion along all of said heterogeneous feature spaces as recited in claims 8, 13, 20;
- Claims 2-7, 9-12, 15-19, 22-26 being further limiting and definite are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
